Empowering, encouraging, exciting, educating, engaging and entertaining. Event is on the 16th September 2018 from 5.30pm-8pm. The Verbal Hound is the main host and curator of the variety and excellence of spoken word, poetry, performance, music and more. It is a monthly event in the heart of The Lane. I firmly believe that when art has the courage to speak the truth, it is its best chance of getting heard. To this end, my event showcases the performing arts and is an open-hearted opportunity for social change to happen. Art can and must be used to inspire others and break down the barriers of hatred and prejudice. The theme of this month's event

Use the KEYMACRO keyboard shortcut to import a menu into an application. Mac OS 10.2 or newer is required. Launch KeyRemap4MacBook by double-clicking on it. Select the first item in the menu, KEYMACRO, under the Keyboard menu and press the Fn key. What is a menu? Menus are different from windows in several

respects. The first and most important distinction is that you cannot move between windows with a keyboard shortcut, but you can move between menus. For example, in a text editor you can open a document by pressing Ctrl+O (Command+O on Mac) to go to the open document menu, or you can open a new document by pressing Ctrl+N (Command+N on Mac). The second, and more important, distinction is that a menu is usually a shortcut menu. For example, in MS Word you can click the File menu and then click on a menu item such as Save, or you can use the CTRL+S (Command+S on Mac) keyboard shortcut. Another example is the Windows Edit menu. The Edit menu is a shortcut menu which is automatically added to menus such as File, Edit, View, and Tools. The third distinction is that menus are different than dialogs. A dialog is a window that appears when you are running a program and that allows you to enter information. A dialog is not a shortcut menu. For example, in MS Word you cannot click the File menu and then click on a menu item such as Save, because there is no File menu to click. The fourth distinction is that menus can have a shortcut menu. The Edit menu, for example, has a shortcut menu which is automatically added to the File menu. The fifth distinction is that you cannot move between menus or move between a menu and a window with a keyboard shortcut. You can move between windows, but not menus. You can move between a menu and a window with a mouse. Now we can look at what you can do with a menu. What you can do with a menu Move between menus or a menu and a window with a keyboard shortcut. This means you can press a keyboard shortcut (such as the arrow keys) to move between menus. Move between a menu and a window. This means you can use the mouse to move between a menu and a window. Use a menu that has a shortcut menu. This means you can press a keyboard

As Canada's population ages, the country's health care system will need to pick up the slack. While the experts may debate the nature of the country's "old-age" dependency ratio - whether the ratio of the elderly to working-age population is a cause for concern or a good thing - they are unanimous on this: by 2036, nearly one in three Canadians will be 65 or older. Story continues below advertisement That is one of the key findings in a new report prepared by Statistics Canada, which found that by 2036, Canada's population will contain nearly 3.5 million seniors - a number that represents nearly 27 per cent of the population - up from 21 per cent today. In 2017, seniors
